

Please do not let Low Power FM have priority over current FM translator service. As an listener and financial supporter of K-Love radio I appreciate its family friendly programming. It is wonderful to be able to listen to family friendly programming when going from town to town. The ability to listen to this station via translators means I can know the programming is safe for my whole family. This station does provide a psotive and encouraging impact on communities all around America. The kind of programming K-Love provides is not usally found on the radio dial. If a translator signal were replaced by a Low Power FM it mean this family friendly programming would not be available for my community. Thank You
